

**MANCHACA FIRE/RESCUE
PROBATIONARY FIREFIGHTER SKILLS EVALUATION**

OPERATION OF CAFS HOSELINES

Objective:

The probationary firefighter shall demonstrate the handling and proper operation of CAFS hoselines for wet, medium, and dry CAFS streams.

Instructions:

Wearing structural firefighter PPE, the PFF will deploy a CAFS hoseline. The PFF will properly handle the stream and modify the nozzle as needed for wet, medium and dry CAFS application. The PFF will identify uses for wet, medium, and dry foam as well as the indicators and cause of slug flow.

Preparation and Equipment:

CAFS Engine
CAFS Attack Line
Firefighter's Structural PPE

OPERATION OF CAFS HOSELINES

Candidate: _____

Date: _____

Examiner: _____

Test: PASS: _____ Retest: PASS: _____

FAIL: _____

FAIL: _____

OPERATION OF CAFS HOSELINES	TEST		RETEST	
	S	U	S	U
1. Properly deploys the CAFS line per its hose load				
2. Properly controls line and reaction force when operating line				
3. Demonstrates proper stream application for a wet CAFS stream				
4. Describes use for medium CAFS foam stream				
5. Adjusts nozzle for application of a dry CAFS stream				
6. Describes use for dry CAFS foam stream				
7. Flushes CAFS line before breakdown for reload				
8. Defines cause of slug flow and describes how to recognize it
